Haley Conroy

Haley is a second-year clinical psychology doctoral student in the Child Temperament, Thoughts, and Emotions Lab at the University of Houston. She graduated from the University of Texas at Austin in 2017, with a BA in Psychology and a minor in Communications. Her research interests are primarily in the psychosocial factors (e.g., familial, cognitive, temperamental, cultural) that modulate treatment efficacy of anxiety and related disorders among children and adolescents.

Madeleine Desrochers

Madeleine is a third-year doctoral student in the Counseling Psychology program under the advisement of Dr. Marcel de Dios. She completed her B.A. in Psychology at Texas A&M University and her M.Ed. in Counseling Psychology at UH. She has worked in various settings, including a residential treatment center for Texas foster youth, a child advocacy center, and a behavioral health clinic. Her research interests have focused on studying the differences between men and women's social and cognitive experiences. She joined Dr. Jonathan Schwartz's M.A.G.I.C. lab in 2016 as a master's student and defended her thesis analyzing men and women's reaction to a frustration induction task. Under Dr. de Dios' PAC lab, she is currently working on her dissertation exploring psychosocial constructs effecting survivors of gender and sexual harassment and assault. She completed her first doctoral practicum rotation at the Houston Fire Department under the supervision of Dr. Sam Buser and Dr. Jana Tran and is currently completing my second rotation at Texas Children's Hospital under the supervision of Dr. Marni Axelrad.

Morgan McNeel

Morgan McNeel is currently a 4th year doctoral student in the school psychology program at University of Houston. She previously attended Rice University for undergrad, where she studied psychology and neuroscience. After graduating, she worked for 2 years at UT Health as a research and clinic coordinator prior to starting graduate school. Her primary research and clinical interests are in working with kids with autism spectrum disorders and their families.

Andrew Rogers

Andrew Rogers is a 4th year clinical psychology Ph.D. graduate student at the University of Houston in the Anxiety and Health Research Laboratory. His research mentor is Dr. Michael Zvolensky, and his research focuses on the intersection of chronic pain and substance use. Clinically, Andrew has previously worked at the Psychology Research and Services Center and the Houston VA, and currently works at an outpatient private practice delivering evidence-based treatment, including DBT, CBT, CBASP, and ACT. Prior to coming to the University of Houston, Andrew graduated from Tufts University and worked as a research coordinator at Massachusetts General Hospital at the Center for Anxiety and Traumatic Stress Disorders under the direction of Dr. Naomi Simon.
